Budget Forecast — FY 2027 (Draft)

Author: CFO / Finance Team
Department: Confidential
Last Updated: 2026-04-20
Classification: confidential

This draft FY 2027 budget forecast models three scenarios (Base, Upside, Downside) based on Project Atlas GA adoption rates. The Base scenario projects \$22M ARR by Dec 2027, requiring a \$14M Series B raise in Q4 2026 to fund the planned headcount expansion from 62 to 110 employees. The Project Nightingale acquisition (\$20–24M) is included as a contingent item in the Upside scenario only.

1. Revenue Forecast

Scenario	FY27 ARR	Atlas % of ARR	Series B Required
Downside	\$14M	45%	\$8M
Base	\$22M	62%	\$14M
Upside	\$34M	78%	\$20M

2. Headcount & Cost Plan (Base)

Department	FY26 HC	FY27 HC	Net Adds	Cost (\$M)
Engineering	28	46	+18	\$11.2
Product	8	12	+4	\$2.8
Sales & CS	14	28	+14	\$6.4
G&A	12	16	+4	\$4.2
Total	62	102	+40	\$24.6

3. Project Atlas Budget Allocation

Project Atlas is the primary investment vehicle in FY 2027. Allocated budget: \$8.4M (engineering compute, GPU inference, Qdrant cluster expansion, and LLM API costs). This represents 34% of total opex budget. The Project Atlas budget was \$2.4M in FY 2026 (see Board Meeting Minutes for the approved figure).
