Classification: confidential

NovaTech is in active partnership negotiations with two strategic accounts: FinCorp (financial services, 12 000 employees) and RetailMax (e-commerce, 4 500 employees). Combined, these deals represent \$2.1M ARR and will serve as anchor case studies for the Project Atlas enterprise segment. Both deals are gated on SOC 2 Type II certification and EU data residency completion.

1. FinCorp Deal Summary

FinCorp is deploying Project Atlas across their compliance and regulatory documentation workflow — 2.4M documents, 18 000 active Confluence pages. Proposed ARR: \$480 000/year (3-year commitment). Key requirements: on-premise Qdrant deployment option, FIPS 140-2 encryption, and a dedicated Customer Success manager.

Deal risk: FinCorp's procurement team requires SOC 2 Type II before contract signature. If NovaTech's SOC 2 audit (scheduled Q3 2026) slips, FinCorp has indicated they will proceed with a competitor. This creates a hard dependency between the SOC 2 timeline and the FinCorp close.

2. RetailMax Deal Summary

Item	Detail
Proposed ARR	\$180 000/year
Contract Term	2 years
Use Case	Product knowledge base Q&A for 800 support agents
Queries/mo	~400 000
Key Requirement	EU data residency (GDPR compliance)
Close Target	2026-08-01

3. Negotiation Status

- FinCorp: Term sheet signed 2026-03-05; technical due diligence ongoing.
- RetailMax: MSA under legal review; data processing agreement (DPA) in draft.
- Both deals: pricing finalised; SLA terms (99.9% uptime, <500ms P95) under negotiation.
- Risk: Project Atlas GA slip beyond August 2026 may cause RetailMax to push close to Q4.
