Customer Feedback Analysis — Q1 2026

Author: Kavitha Ramesh

Department: Product

Last Updated: 2026-04-05

Classification: internal

Analysis of 847 NPS responses, 34 customer interviews, and 1 200 in-app feedback submissions collected in Q1 2026. Overall NPS improved from 31 to 44. Top requested features: multi-document Q&A; (Feature X), Slack integration, and role-based access for shared workspaces. Project Atlas beta users report 91% satisfaction with answer quality.

1. NPS Trend

Quarter	Promoters	Passives	Detractors	NPS
Q3 2025	41%	21%	38%	3
Q4 2025	48%	24%	28%	20
Q1 2026	62%	20%	18%	44

2. Top Requested Features

- Multi-document Q&A; (Feature X): 68% of Growth customers — top priority.
- Slack integration: 54% of Enterprise prospects mention during sales calls.
- RBAC for shared workspaces: 47% of team-account customers.
- EU data residency: 31% of European pipeline deals cite as a blocker.
- Custom embedding model support: 22% of technical users.

3. Project Atlas Beta Feedback

34 beta users from 8 enterprise accounts participated in the Q1 pilot. 91% rated answer quality as 'good' or 'excellent'. Main complaints: response latency (avg 2.1s perceived), lack of source document preview, and no ability to ask follow-up questions in context.

Qdrant-powered retrieval was praised by 3 engineering-heavy accounts who noted answer accuracy significantly exceeded their previous keyword-search solutions. One customer (TechRetail) reported a 3× reduction in support ticket escalations after deploying Atlas on their internal knowledge base.
